ABOUT ME

I'm a passionate Website Developer who loves turning ideas into smooth, user-friendly web experiences. I build responsive and modern applications using React, Next.js, Angular, HTML, CSS, and JavaScript. I pay strong attention to detail, focusing on clean code, performance, and design that feels natural to users. I've worked on projects like e-commerce platforms, dashboards, and smart booking interfaces, each built with scalability and creativity in mind. I'm experienced with API integration, state management (Redux), Tailwind CSS, and collaborative version control using Git. I enjoy working with teams to build meaningful digital products and I'm constantly exploring new technologies to stay ahead in the fast-moving web world. My goal is always to create intuitive, reliable, and engaging experiences that make a real impact.

SKILLS

Technical Skills: Javascript | Typescript | Angular | Vue | Wordpress | React | Next.Js | TailwindCss | React Query | Git | GitHub | Astro.Js | Firebase | Supabase | Gsap | Framer Motion | React Native

WORK EXPERIENCE

Lush Allure   **MAY 2025-Present**
Frontend Developer   *Remote*
- **Developed and maintained responsive web interfaces** using modern frontend technologies (React.js and Next.js).
- **Collaborated with cross-functional teams** like product designers to implement scalable features.
- **Optimized frontend performance and accessibility**, ensuring fast page loads, mobile-first designs, and SEO-compliant structures for improved discoverability and user engagement.

Sobisay Studios   **DEC 2024**
Frontend Developer   *Remote*
- Developed and designed a responsive landing page that improved the brand's online presence and user engagement using React and TailwindCSS.
- Collaborated with the brand team to translate their vision and goals into a clean, functional, and visually appealing digital interface.
- Implemented modern UI/UX practices to ensure fast load time, cross-device compatibility, and seamless navigation.
